Report

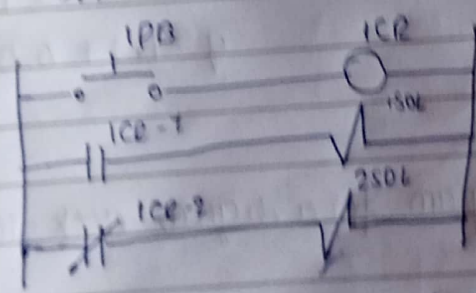

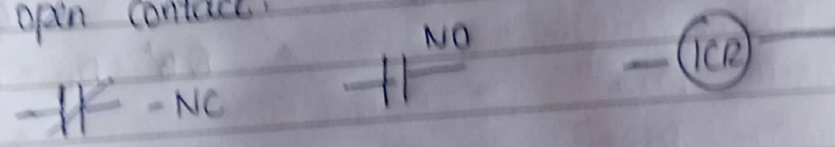

Application of Programmable logic controllers

- It is the major controller of control system
- Delay of bits

 Normally closed contact

 normally open contact

- moving contact / common (4 sets)
- It is time for a small transition in how the contacts are designed
- includes a common contact also the normally closed & open contact.

Is anything in this circuit currently energized - 2SOL
are any of the contacts currently true? - ICR-2 False - IPB & ICR-1
with IPB closed?

Stop - normally closed
 Push button

Start - normally open
 push button
