Date - June 3

Course - Python

Topic - Build web based
Financial Graph.

Repository - Rashmi K

Name - Rashmi

USN - UAL18EC043

Sem - IV Sem

Report:

Build web based Financial Graph:

How to get data base -

- * get recent data from ur company i.e. Apple
- * from pandas - data reader import data

Data, data reader?

```
name = "AAPL", data source = "yahoo start = 'end'  
start = date time, date time  
import date time.  
end = start time, date time
```

Stock market data -

with candlestick chart.

and candlestick chart with Bokeh.

Candlestick segments.

stylizing the chart.

Note:

Depending on your version of Bokeh you may get an `IndexError: list index out of range` error. If that is the case please on how to easily fix that.
