## Salesforce

### Report :

Salesforce Developer experience : Quick look.

- \* When we build features on the customer 360 platform, we taken an API-first approach.
- \* Trust is our number one value.
- \* The platform supports OAuth standards to protect your data.
- \* The customer 360 platform built with the lightning component framework.
- \* Our developer experience is flexible. than your team can build together.
- \* The lightning framework makes it easy to work the latest web standards.
