

## Afternoon session

classmate

Date \_\_\_\_\_  
Page \_\_\_\_\_

Date - 21/5/2020

Course - Python

Topic - Making  
the app

Name : Rashmi, K

USN : HALIBEC043

Sem : IV, A.

### Report:

- The statements retrieved all the rows of the dictionary table where the value of the column expression was null. The string from inside cursor.execute() is SQL code that python sends to the database.

### Pandas :

- \* Pandas are used for loading data from datamines.
- \* To install pandas:  
pip/pip3 install pandas
- Ipython is just like the normal shell you get when you run python, but Ipython provides better printing for large text.
- \* To load CSV files:  
import pandas  
df1 = pandas.read\_csv("supermarkets.csv")
- \* The supermarkets.json file can be found inside the supermarkets.zip file attached in #.
- \* To load excel files in Python with Pandas.  
pandas may require the xlrd library as a dependency.  
pip install xlrd or  
pip3 install xlrd

from geopandas import Nominal  
nom = Nominal()

change them to these

from geopandas import ArcGIS  
nom = ArcGIS()

The rest of code remains same.

Date - 21 May  
 Course - TCS ien  
 Topic - Telephonic  
 etiquette

Name - Rashmi.k  
 USN - UAL18EC043  
 Sem - IV Sem 'A'
