

Morning session.

Date - 17/6/2020

Course - Statistical learning

Topic - Introduction

Repository - Rashmi.k

Name - Rashmi

USN - UALUREC043

Sem - IV Sem.

Report:

1. Solution for case study
2. Introduction to probability
3. Rules for probability calculation
4. Bayes Theorem
5. Normal Distribution

probability meaning & concepts -

- * probability refers to chance or likelihood of a particular event taking place.
- * An event is an outcome of an experiment.
- * An experiment is a process that is performed to understand and observe possible outcomes.
- * Set of all outcomes of an experiment is called sample space.
